SUMMARY

Frontend-led full-stack engineer, 4+ years professional (building for the web since 2016). Shipped six production React / Next.js / TypeScript and React Native products for North American clients in insurance, HIPAA healthcare, telehealth and IoT, most recently a public data portal on Next.js 16 / React 19 and a BLE mobile app. Owns the frontend end-to-end and works across the stack when the team needs it: Laravel controllers and migrations, REST integration over Django and Node.js backends, CMS and payments.

EXPERIENCE

Frontend Developer — Agilno

Jan 2023 – Aug 2026

Product agency; embedded in six North American client teams · remote

BioCirV Data Portal · public biomass-discovery platform (biocirv.beamcircular.org) — Feb 2026 – Jul 2026

- Built the public discovery UI from scratch, responsive and accessible (semantic HTML, keyboard navigation): search with autocomplete, faceted filters, interactive maps, biomass profiles and Recharts dashboards over a Django REST API.
- Designed the data layer (TanStack Query + URL-synced filter state) so every search is a shareable link and results stay cached across navigation.
- Owned the frontend foundation two other developers built on, and reviewed their pull requests: component system, typed forms (React Hook Form + Zod), Figma-to-code workflow, commit conventions and QA handoff.

`Next.js 16 (App Router) · React 19 · TypeScript · Tailwind 4 · TanStack Query · Zod`

OnCallable · marketplace connecting customers with service professionals (oncallable.com) — Jan 2026 – Jul 2026

- Replatformed a static marketing site to a CMS-driven Sanity architecture in about two weeks; editors now ship pages, sections, popups, redirects and A/B tests with zero developer deploys.
- Built SEO and answer-engine optimization with structured FAQ schemas (JSON-LD).

`Next.js 14 · TypeScript · Tailwind CSS · Sanity`

Suello · BLE-connected smart-planter app, Toronto IoT startup (suello on LinkedIn) — Apr 2025 – Nov 2025

- Built the companion mobile app from scratch in React Native: BLE pairing and device-communication layer, authentication, and the onboarding flow with custom animations.

`React Native 0.78 · TypeScript`

Vetster · pet-telehealth marketplace, Toronto (vetster.com) — Jul 2024 – Apr 2025

- Shipped Vue.js features (vet onboarding, profile and account-settings screens) on a 24/7 video-consultation platform with 100k+ app users.
- Backend: Laravel controllers and database migrations for user and vet profile data (profile fields, onboarding, account settings).

`Laravel · PHP · Vue.js · PostgreSQL`

Naitur · platform for licensed psilocybin therapy clinics (US, HIPAA — naitur.ai) — Aug 2023 – Jul 2024

- Shipped the responsive frontend for a US-regulated platform (100+ facilitators and 15+ clinics onboarded in its first week).
- Built JWT magic-link auth, multi-party e-signature flows, data tables, export and analytics on HIPAA-compliant infrastructure.

`React · TypeScript · REST (Node.js backend)`

BuddyIns · US long-term-care insurance platform (buddyins.com) — Jan 2023 – Jul 2023

- Built the Next.js frontend over a Django REST API: auth flows, PayPal subscription checkout integration, CRUD screens, data tables and CSV export.

`Next.js · React · PayPal API`

EARLIER EXPERIENCE

amondi GmbH (Zagreb, hybrid) · Frontend Web Developer: CMS-driven React apps (car-catcher.de, buildmycareer.de) — Apr 2022 – Nov 2022

Reroot (remote, contract) · Web Developer: full redesign of the Agrivi marketing site, a farm-management SaaS (agrivi.com · WordPress, PHP, multilingual) — Jul 2020 – Mar 2021

Robinson Restaurant (Hvar · robinson-hvar.com) · Freelance web developer: custom WordPress theme from scratch (PHP); the owner reported inquiries up about 200% after launch — 2019 – 2021

SKILLS

FRONTEND: React, Next.js (App Router, SSR/SSG), TypeScript, JavaScript, Vue.js, Tailwind CSS, HTML5, CSS3, TanStack Query, React Hook Form, Zod, Recharts, Astro

BACKEND: Laravel / PHP (controllers, migrations), WordPress theme development (PHP), REST API integration (Django REST, Laravel, Node.js backends), PostgreSQL, MySQL, PayPal API, Sanity CMS

MOBILE: React Native, BLE / Bluetooth Low Energy integrations

TESTING & QUALITY: Vitest, Playwright (browser QA), accessibility (semantic HTML, keyboard navigation, Lighthouse a11y audits), web performance (Lighthouse, Core Web Vitals), CI/CD (GitHub Actions, Bitbucket Pipelines), ESLint, Prettier

TOOLING & LANGUAGES: Git, Vercel, WordPress, Figma, Claude Code, Cursor · English (fluent), Croatian (native)

PUBLIC CODE: github.com/kristijan-kresic-hvar/portfolio-v2 — Astro 6 + TypeScript, Vitest, commitlint, GitHub Actions CI with automated PR review

EDUCATION

Algebra Bernays University (Sveučilište Algebra), Zagreb · Certificate programme: PHP & MySQL Backend Development — 2017 – 2018

Algebra Bernays University (Sveučilište Algebra), Zagreb · Certificate programme: Frontend Development & Graphic Design — 2016 – 2017
