SUMMARY

Frontend engineer with 4+ years of professional experience (building for the web since 2016). Shipped production frontends on six North American web and mobile products across insurance, HIPAA healthcare, telehealth and IoT. Owns the frontend end-to-end: architecture, data layer, component system, forms and delivery, working remote and async with distributed product teams.

EXPERIENCE

Frontend Developer — Agilno

Jan 2023 – Aug 2026

Product agency; embedded in 6 North-American client teams · remote

BioCirV Data Portal · public biomass-discovery platform (biocirv.beamcircular.org) — Feb 2026 – Jul 2026

- Built the public discovery UI from scratch, responsive and keyboard-accessible: search with autocomplete, faceted filters, interactive maps, biomass profiles and Recharts dashboards over a Django REST API.
- Designed the data layer (TanStack Query + URL-synced filter state) so every search is a shareable link and results stay cached across navigation.
- Owned the frontend foundation two other developers built on, and reviewed their pull requests: component system, typed forms (React Hook Form + Zod), Figma-to-code workflow, commit conventions and QA handoff.

`Next.js 16 (App Router) · React 19 · TypeScript · Tailwind 4 · TanStack Query · Zod`

OnCallable · marketplace connecting customers with service professionals (oncallable.com) — Jan 2026 – Jul 2026

- Replatformed a static marketing site to a CMS-driven Sanity architecture in about two weeks; editors now ship pages, sections, popups, redirects and A/B tests with zero developer deploys.
- Built SEO and answer-engine optimization with structured FAQ schemas (JSON-LD).

`Next.js 14 · TypeScript · Tailwind CSS · Sanity`

Suello · BLE-connected smart-planter app, Toronto IoT startup (LinkedIn) — Apr 2025 – Nov 2025

- Built the companion mobile app from scratch in React Native: BLE pairing and device-communication layer, authentication, and the onboarding flow with custom animations.

`React Native 0.78 · TypeScript`

Vetster · pet-telehealth marketplace, Toronto (vetster.com) — Jul 2024 – Apr 2025

- Shipped Vue.js features (vet onboarding, profile and account-settings screens) on a 24/7 video-consultation platform with 100k+ app users.
- Backend: Laravel controllers and database migrations for user and vet profile data (profile fields, onboarding, account settings).

`Laravel · PHP · Vue.js · PostgreSQL`

Naitur · platform for licensed psilocybin therapy clinics (US, HIPAA — naitur.ai) — Aug 2023 – Jul 2024

- Shipped the responsive frontend for a US-regulated platform (100+ facilitators and 15+ clinics onboarded in its first week).
- Built JWT magic-link auth, multi-party e-signature flows, data tables, export and analytics on HIPAA-compliant infrastructure.

`React · TypeScript · REST (Node.js backend)`

BuddyIns · US long-term-care insurance platform (buddyins.com) — Jan 2023 – Jul 2023

- Built the Next.js frontend over a Django REST API: auth flows, PayPal subscription checkout integration, CRUD screens, data tables and CSV export.

`Next.js · React · PayPal API`

EARLIER EXPERIENCE

amondi GmbH (Zagreb, hybrid) · Frontend React Developer: CMS-driven React apps (car-catcher.de, buildmycareer.de) — 2022

Reroot (remote, contract) · Web Developer: full redesign of Agrivi, a farm-management SaaS (agrivi.com · WordPress, PHP, multilingual) — 2020 – 2021

Robinson Restaurant (Hvar · robinson-hvar.com) · Freelance full-stack: custom WordPress theme from scratch (PHP); the owner reported inquiries up about 200% after launch — 2019 – 2021

SKILLS

FRONTEND: React, Next.js (App Router), TypeScript, JavaScript, Vue.js, Tailwind CSS, HTML5, CSS3, TanStack Query, React Hook Form, Zod, Recharts, Astro

MOBILE: React Native, BLE / Bluetooth Low Energy integrations

BACKEND: PHP / Laravel, REST API integration (Django REST, Laravel, Node backends), PostgreSQL, MySQL

TESTING & TOOLING: Vitest, Playwright (agent-driven browser QA), CI/CD (GitHub Actions, Bitbucket Pipelines), ESLint, Prettier, Git, Vercel, Sanity CMS, WordPress, Figma, Claude Code, Cursor

PUBLIC CODE: github.com/kristijan-kresic-hvar/portfolio-v2 — Astro 6 + TypeScript, Vitest, commitlint, GitHub Actions CI with automated PR review

EDUCATION

Algebra University (Sveučilište Algebra), Zagreb · Certificate programme: PHP & MySQL Backend Development — 2017 – 2018

Algebra University (Sveučilište Algebra), Zagreb · Certificate programme: Frontend Development & Graphic Design — 2016 – 2017
